

# COMMUNITY-BASED RESTORATION MONITORING Volunteering

We are looking for organizations and volunteers who would like the opportunity to learn more about stream restoration Best Management Practices (BMPs) and help us monitor their impact! We provide all of the equipment, training, and hands-on experiences.

Monitoring locations are in Lancaster, PA and Westminster, MD.

## About

### Our monitoring team will teach you how to:

- Visual/Physical Assessment (stream geometry, substrate size, embeddedness)
- Water Quality Indicators (water temp and water clarity)
- Benthic macroinvertebrates (family level ID)
- Standard Photographs

\*Each monitoring day takes about 3 - 4 hours in total. You will monitor in a group of 3 - 5 people.

## Volunteer

### Attend the virtual program orientation:

Where: Zoom

When: March 7 at 12pm - 12:45pm

**Virtual Orientation**
